EDUCATION

National Institute of Technology Calicut **Aug 2026 – Present**
M.Tech in Computer Science and Engineering *CGPA: Sem 1*

Rajalakshmi Engineering College, Anna University **Jun 2020 – Jun 2024**
B.E. in Computer Science and Engineering *CGPA: 9.41/10 (Department Rank 3/362)*

EXPERIENCE

BNY **Jul 2024 – Jul 2025**
Developer Analyst (Production Services: AI/MLOps, Automation Monitoring) *Chennai, India*

- **Conversational AI Platform:** Built a real-time compliance monitoring tool for automation coverage and resiliency across US/EMEA using RAG-based LLMs, Kafka, and REST APIs, achieving 97% compliance and 95% accuracy.
- **AI-driven Incident Management:** Developed an LLM-powered root-cause analysis framework (LangChain, Gemini, Claude, Streamlit) for the Asset Servicing LOB, cutting P3/P4 incident triage time by 80%.
- **TrustForge AI:** 5-agent LLM verification pipeline for Controls and Corporate Actions, detecting hallucinations and grounding confidence-scored, cited outputs in evidence; benchmarked on 500+ queries across 4 reliability metrics.
- **Capacity Resource Forecasting and Routing:** Benchmarked ARIMA and Prophet for capacity forecasting, deploying Prophet for 55% lower MAPE, and built an ML-driven payment channel router that cut transaction costs by 40%.
- **AutoRFC (AI-Driven Change Automation):** Built an end-to-end GPT-4o (via LangChain) LLM pipeline that scans code changes, auto-generates and updates ServiceNow RFCs with change context, and closes tickets on approval, cutting manual change effort by 70% across various applications for the global SRE team.

BNY **Jan 2024 – Jun 2024**
Analyst Intern *Chennai, India*

- **CTOC Sentinel for CTOC Production Services:** Built an automated Python incident-reporting chatbot using LangChain, GPT-3.5 Turbo, and custom APIs to deliver real-time NLP-driven root-cause insights, reducing recurring incidents by 68%.
- **Unified Automation Portal:** Built a MERN-stack portal consolidating automation coverage, touchpoint reduction, and monitoring compliance across 7 LOBs, with one-click test execution via ServiceNow and Ansible.
- **Automated User Access Reporting:** Developed a Java microservices-based client reporting system with asynchronous processing, saving UK and US dev teams 20 hours per month and achieving 89% file monitoring coverage.

PROJECTS

RaftKV - Distributed Key-Value Store | Go, gRPC, Docker, Protocol Buffers **Project Link**

- Built a 5-node Raft consensus with leader election, log replication, and snapshotting (50K+ writes/s, p99 latency < 20ms).
- Stress-tested under node crashes and network partitions with zero linearizability violations and leader failover in < 1.5 s.

LedgerFlow - Payments Platform | Spring Boot, Node.js, React/TS, Postgres, Redis **Project Link**

- Built Stripe-like double-entry ledger with idempotent transfers and outbox events (10K concurrent transfers, 0 double-spends); Created signed webhook retries and DLQ, achieving 100% delivery despite receiver outages (p99< 200 ms).

SafeMind AI | Python, PyTorch, Hugging Face Transformers **Project Link**

- Built transformer-based suicide risk detection & support chatbot, with 0.84 macro-F1, 0.88 PR-AUC, and 91% minority-class recall on real-time social media dataset.

OrderBook - Low-Latency Matching Engine | C++20, lock-free queues, perf **Project Link**

- Built fuzz-verified C++ matching engine (zero-alloc, lock-free): 10M orders/s, p99 <3 µs on 10M Binance L2 events.

TECHNICAL SKILLS

Languages: C/C++, Go, Python, Java, SQL, JavaScript, TypeScript

ML / Data: PyTorch, Scikit-Learn, Pandas, NumPy, Pinecone, OpenCV, LangChain, LangGraph, PySpark, TensorFlow, MLflow

Web Frameworks & Runtimes: React, Node.js, Express.js, Spring Boot, FastAPI

Systems & Tools: Docker, Kubernetes, Git, Linux, AWS, PostgreSQL, MongoDB, Redis, CI/CD (GitLab), Ansible

ACHIEVEMENTS & CERTIFICATIONS

- **Certifications: AWS** Solutions Architect (2026), Neural Networks and DL (2024), **Stanford** Machine Learning (2022)
- **Best Project Solution and Overall Winners: BNY** HackAIThon (2025)
- **Academic Excellence Award and Best Outgoing Student Award (CSE):** Rajalakshmi Engineering College (2024)
- **Best Software Engineer and Best Overall Project: Cognizant** (CAFÉ Hackathon 2023).
